ABOUT ME

I work concentrated and with determination in all of my projects.

I always strive to achieve the best-possible solution and deliver it on-time and within budget.

In my private life as well as at work, it's important to me to show dedication, accomplish good results and continuously develop myself.

Friends and work colleagues appreciate my social competence. I like working within a team to achieve a common goal. I don't shy away from conflicts but always try to address them respectfully and in an appropriate way.

Sport, friends and my family offer me the perfect balance to work. These include sailing, table tennis and paddling. In my free time, I program.

I love to travel and explore the world to experience different cultures and to expand my personal horizons.

EDUCATION

CAS
Jan. 2026 – Jul. 2026

FFHS Zürich
CAS AI Engineering
Conception and implementation of a RAG-based IT support assistant on enterprise ITSM data, including evaluation framework and data quality policy.

STUDY
Sept. 2020 – Oct. 2024

FHNW BRUGG/WINDISCH
Bachelor of Science Informatics

Bachelor thesis
Conception and implementation of an interface for the automatic evaluation of completed sports activities for AZUM AG.

MEDIUM MATURITY
2005 - 2006

TBA BAD SÄCKINGEN
Technical college

ELEMENTARY SCHOOL
1984 - 1993

GRUND/HAUPTSCHULE MURG

SKILLS

KI & AI Engineering:
Retrieval-Augmented Generation (RAG), LLM Orchestration (LlamaIndex), Vector Databases (Qdrant), Embeddings (bge-m3), Local LLM Deployment (Ollama, Llama 3.1, Qwen 2.5), LLM Evaluation (RAGAS, LLM-as-a-Judge), Golden Standard Datasets, Prompt Engineering, AI Governance

TECHNICAL SKILLS (*SOFTWARE*)
AI Engineering, Cloud Engineering, DevOps (CI/CD, Docker, Kubernetes), IaC (Ansible, Terraform), SQL & NoSQL, Java, Python, HTML, JavaScript, React, REST APIs, GraphQL, AI Services, functional programming,

TECHNICAL SKILLS (*NETWORK*)
Cisco IOS, BGP, OSPF, VLAN, VPN, MPLS, IPv4/IPv6, Firewall (Fortigate, pfSense), Network Monitoring, Traffic Engineering, Netzwerkautomatisierung (Ansible, Terraform), Peering & Transit

Network Certifications
Mikrotik Certifications

TECHNICAL SKILLS (*INFRASTRUCTURE & VIRTUALIZATION*)
Server Architecture, Virtualization (VMware, Proxmox), Data Center Operations, Fiber optic planning, Routing, Edge- & Backbone-Networks

TECHNICAL SKILLS (*SECURITY & COMPLIANCE*)
IT-Security (DSGVO, ISO 27001), Security concepts, Emergency management, Access control

TECHNICAL SKILLS (*PROJECT & TEAM MANAGEMENT*)
IT Project Management, Digitalization, SCRUM, Agile Methods, Team Leadership, Strategic Planning, Corporate management

TOOLS
Enterprise Architect, Visual Studio Code, Microsoft Office, Microsoft SQL Studio, Eclipse, IntelliJ, Google Office, Jira, Github, Gitlab

PROFESSIONAL EXPERIENCE

Head of DevOps
April 2026 - current

AXPO SYSTEMS AG
Head of Network DevOps, leading a team of 11 engineers with a focus on individual development, clear communication, and a culture of ownership. Driving the automation strategy across network operations and automated staging of network configurations. Combining technical leadership with hands-on engineering. Implemented AI-based tasks to analyze and evaluate work packages from SAFe PI planning, improving estimation quality and transparency.

Network Engineer
July 2025 – March 2026

AXPO SYSTEMS AG
Design and implementation of automated network solutions to optimize operational processes and reduce manual intervention. In-house development of software and tools for automating network configurations, monitoring, and troubleshooting. Building and maintaining custom automation frameworks tailored to complex network environments. Combining hands-on network engineering expertise with full software development capabilities to deliver end-to-end automation solutions.

CEO
Dez. 2006 – Oct. 2019

HOCHRHEINNET GMBH
Leading a regional internet service provider company as CEO with full strategic and operational responsibility:
Built and managed a high-availability network infrastructure including a proprietary data center and fiber-optic backbone with over 2,500 customers
Led cross-functional teams and external partners in infrastructure projects and service delivery
Implemented customer-centric processes and optimized technical operations for improved service quality and scalability
Oversaw IT security, compliance, and continuous modernization of core systems
Successfully managed the company through growth and transformation, leading to a profitable exit in 2019

RADIO & TV technician
1993 - 2005

RADIO OEXLE - RHEINFELDEN
Trained as a Radio and Television Technician, I developed a solid foundation in electronics, signal processing, and technical troubleshooting. This hands-on background laid the groundwork for my later expertise in networking and IT infrastructure.
